

The 10-in-1 Multi-Purpose Disc

125.1010

MULTI-PURPOSE DISC

FD3800

FRAME AND SHANKS

The frame is 2" square steel bars. The shanks are high tensile strength tubular steel.

BEARINGS

Each disc blade individually mounted on heavy duty ball bearings; housing equipped with grease fittings for long bearing life.

CUTTING ANGLES

Cutting and suction angles carefully engineered so that disc does a maximum amount of cutting with a minimum amount of weight.

ADJUSTABILITY

Each shank being individually mounted makes it possible to choose any width of cut. Design permits the use of special cutting angles. Used as a disc harrow, it cuts a greater amount of ground per disc blade.

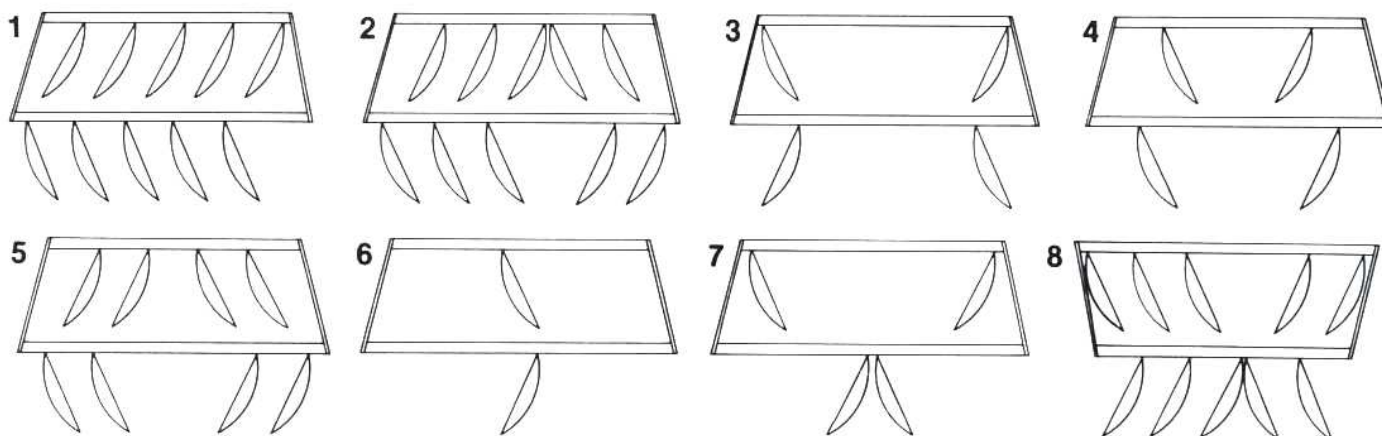

DRAFT

The free rolling ball bearings and cutting angles make this disc especially light in draft. Furnished with each disc is a simple adjustable link which permits setting of the rear shanks with relation to the front so that the cut is uniform. With this adjustment all side draft can be readily eliminated.

A single wrench converts it to:

- 1 Off set or cover crop type
- 2 Tandem type cutting in at rear
- 3 Lister, ditcher or corrugater
- 4 Border or heavy ridger
- 5 Single cultivator row crop trimmer
- 6 Single ditcher
- 7 Double bedder
- 8 Tandem type cutting out at rear
