

DYNA-TRIM

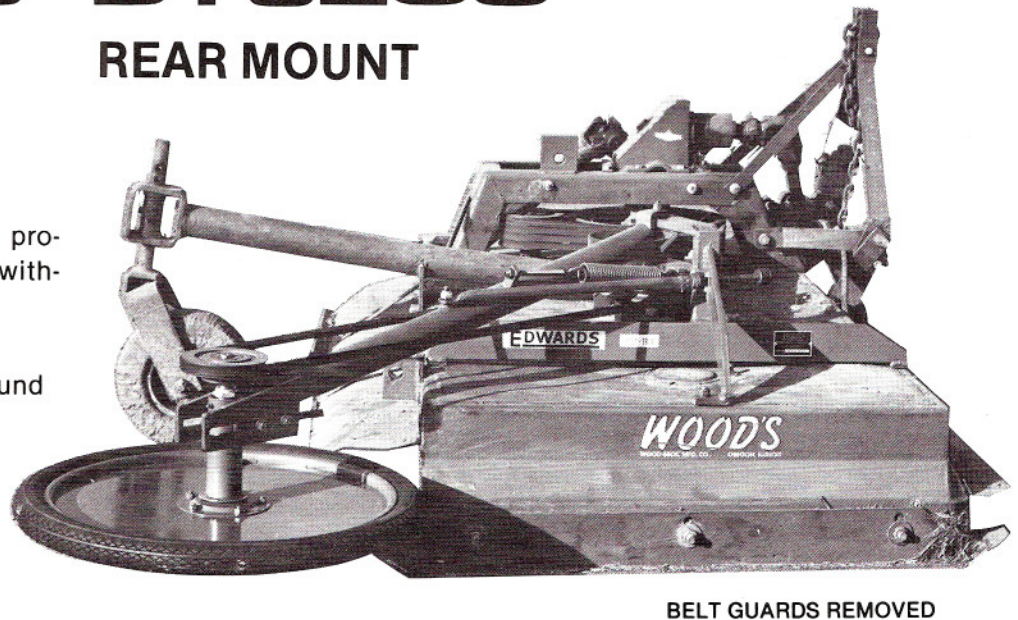

Series DT5100 **FRONT MOUNT**

- Extends 15 inches to side of cutter frame.
- Friction free ball bearing pivots.
- Timken bearings in rotor hub.
- 21 inch double edged spring steel blade.

Series DT5200 **REAR MOUNT**

- Easy on and off.
- Rubber tired bumper wheel protects trees while mowing within two inches.
- Swings in and out around trees automatically.

It is no longer necessary to mow both ways in your orchard. With the Edwards DYNA-TRIM attachment, you can mow in one direction and reach between the trees to get all the grass and weeds in one operation. With the DYNA-TRIM you don't have to mow across ditches. It even reduces pipe handling where sprinklers are used. This not only saves up to 50% mowing time, but also reduces wear and tear on your machinery.
